About Hartwell Plc

While Hartwell Plc was founded in 1919 predominantly for the sale of motor vehicles, in the last 100 years the company has grown geographically throughout the UK, and also diversified into property investment and development, to give the business a solid basis and provide security through diversification.

Hartwell benefits from the significant financial backing of the family owners who wholly own the company. We self fund all of our development projects and investments.

We have built-up a substantial property portfolio where we hold the freehold interest as an investment. Our properties are leased to large Plc's through to small individual occupiers setting-up start-up businesses.

In 2009, we opened an office in Mayfair, London which is dedicated to our London & European projects, with our Oxford office based at Wootton Science Park serving the rest of the UK.

We are proud to have our own in-house facilities management team which controls the day to day operation of our sites and properties meaning you can focus on running your business.
